4.0 - 4.3 mm / 0.16 - 0.17 in

FACTS:

Lays egg rafts on water's surface in areas such as marshes, catch basins and other stagnant water.

Prefers birds over humans.

MALE

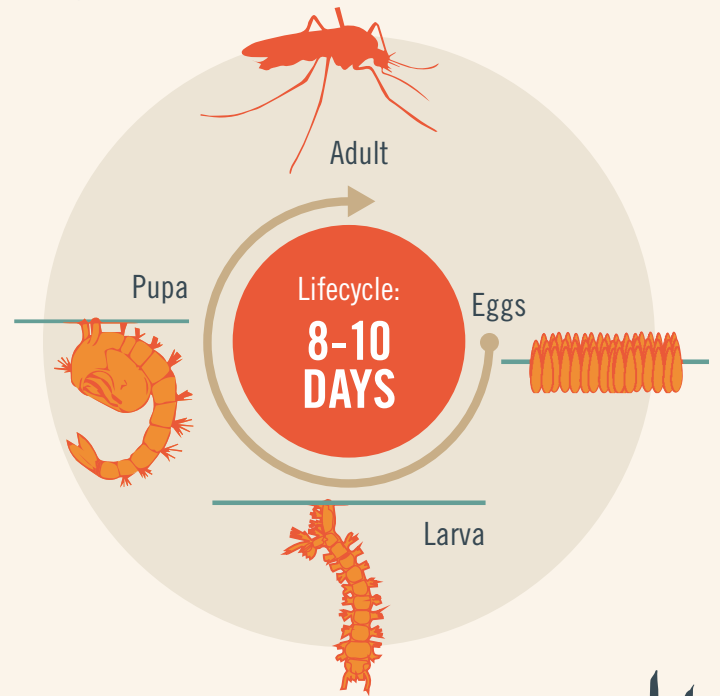

FEMALE

Males don't bite. They feed on nectar and plant fluids.

Primarily bites at dawn and dusk.

LOVE IS IN THE AIR

Male mosquitoes use the buzzing noise from females' wings to find a mate.

GROSS

Prefers to lay eggs in highly organic water, including open septic systems.
